

Why is CerMark® ULTRA Different?

LMC6044 Tile/Glass Marking

- ✗ Non-clogging spray nozzle
- ✗ No hard setting
- ✗ Metal marking
- ✓ Tile/glass marking
- ✗ Stone/brick/slate marking
- ✗ Safe for sensitive metals
- ✗ Durability after laser
- ✗ Full laser speed

LMM6000 Metal Marking

- ✗ Non-clogging spray nozzle
- ✗ No hard setting
- ✓ Metal marking
- ✗ Tile/glass marking
- ✗ Stone/brick/slate marking
- ✗ Safe for sensitive metals
- ✓ Durability after laser
- ✗ Full laser speed

ULTRA

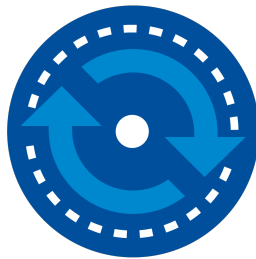

- ✓ Non-clogging spray nozzle
- ✓ No hard setting
- ✓ Metal marking
- ✓ Tile/glass marking
- ✓ Stone/brick/slate marking
- ✓ Safe for sensitive metals
- ✓ Durability after laser
- ✓ Full laser speed

✗ No ✓ Yes

Non-Clogging Nozzle

A new designed valve system allowing for better performance and eliminating the need to store can upside down.

Better Consistency

Formulated to eliminate hard setting or clumping in liquid form and spray cans which allows for easy mixing before use.

Durable

Protects the surface from laser damage even on the most sensitive metals. Marks are scratch and weathering resistant.

Speed

High contrast, durable marks can be achieved more quickly. ULTRA enables rapid marking speeds that result in reduced energy costs with decreased rework.
